## 200 TON FLAT CAR

Built for Chicago North Western R.R. and Pennsylvania R.R.  
By Commonwealth Steel Casting Corp.

This unique car which has the greatest capacity of anything ever built for main line service would be a welcome addition to any layout.

Frame complete detailed die casting with flanges and webs.

Deck plates and top flange members cast integral and fastened to frame with a few self tapping screws. Top of deck plate beautifully detailed with bolt slots and rivet heads.

Full working draft gear with self centering device for couplers cast integral.  
Coupler pockets cast integral with frame.

Car supplied with two pairs Auel Industries fully working and sprung Dalman simplified trucks kits (Andrew trucks also available). Trucks are mounted on a common span bolster will negotiate practically any radius curve without difficult. Reverse curves and just the thing to bring out th beautiful swinging action of the four trucks.

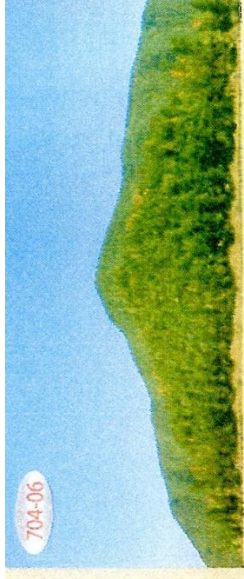

Length of car 12"    Width 2 7/16"

Sufficient weight to prevent pulling off on curves, but not enough to overload motive power.

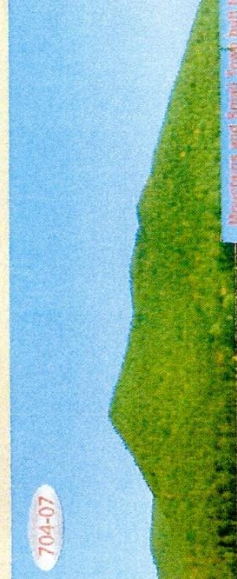

Kit: \$75.00

Plus \$7.00 Shipping

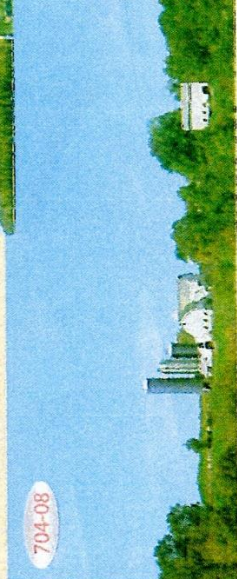

3' WX 13"H

\$15.00

Mountains and State Road built together form a picturesque car drive route.

Autumn Mountains built together to form a picturesque panoramic scene.

New Steel Mills match perfectly to create an industrial scene!
